PROFESSIONAL SUMMARY

Full-stack software engineer delivering five client platforms and a published Android app. Builds accessible, serverless systems from architecture through deployment, including data/storage design, authentication, integrations, and production support; four client sites have achieved 100 Lighthouse scores in Performance, Accessibility, and SEO.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, C#
Web / Cloud: React, Astro, Cloudflare Workers/Pages, D1, KV, R2, REST APIs, Stripe, Resend, Turnstile
Mobile / Tools: Android, Room/SQLite, Jetpack, ZXing, GitHub, CI/CD, AWS, MySQL

PROFESSIONAL EXPERIENCE

Full Stack Developer (Contract) — Grayz'n Buffalo Bar & Grill 2026
Remote | grayznbuffalo.com

- Delivered an Astro + Cloudflare restaurant platform using D1, KV, and R2, with authenticated workflows for menu content, recurring weekly specials, and managed images.
- Built a scheduled Facebook Graph Worker that caches feed/media data and preserves the last known-good feed during refresh failures; integrated Turnstile-protected contact delivery through Resend.

Full Stack Developer (Contract) — Arkham Enterprises / Apex Solar 2026
Remote | arkhamsolar.com

- Built and deployed a React lead-generation platform with multi-step quote intake, Cloudflare Worker form handling, Resend delivery, URL-driven service context, LocalBusiness JSON-LD, and accessible route-focus behavior.

Full Stack Developer (Contract) — Blair Sportsmen's Club 2025–2026
Remote | blairsportsmensclub.com

- Built a D1-backed availability and reservation workflow with admin-managed calendar state and durable request storage when email notification fails.
- Delivered magic-link admin access and CRUD workflows for club events, reservation requests, and trap-league scoring using Turnstile and secure session cookies.

Full Stack Software Engineer (Contract) — KIL Construction & Friends of Lake Henry 2025
Remote | kilcon.work | friendsoflakehenry.com

- Built Astro/Cloudflare operational platforms: R2-backed gallery management and review moderation for KIL, plus D1/KV/R2 workflows for Lake Henry events, raffles, donor recognition, and photo moderation.
- Implemented protected operational boundaries including session-backed administration, CSRF protection for privileged nonprofit mutations, Turnstile, and controlled public/private media delivery.

Android Engineer — Best By Manager 2025
Independent · Google Play | com.bestbymanager.app

- Published a local-first Android inventory app using Java, Room/SQLite, ZXing, and AlarmManager to manage perishables, barcode lookups, discard records, and expiration alerts.
- Designed a shared-device kiosk model with Owner/Admin/Employee roles, bcrypt-backed local credentials, PIN lockout, idle sessions, and biometric-gated owner actions.

EDUCATION & CERTIFICATIONS

B.S. Software Engineering — Western Governors University, 2025
A.A.S. IT Software Developer — Chippewa Valley Technical College, 2024
AWS Certified Cloud Practitioner (2025) • CompTIA Project+ (2024)
