PROFESSIONAL SUMMARY

Full-stack software engineer delivering production TypeScript and React-powered web applications alongside native Android systems. Proven ability to own the full release lifecycle remotely -- from serverless API design and third-party integrations to client deployments -- with a strong focus on security, reliability, and clean documentation.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, C#

Frontend: React, Astro, HTML/CSS

Backend: Node.js, REST APIs, Serverless APIs, Auth, Rate Limiting, CAPTCHA

Platforms: Cloudflare Workers, D1/KV/R2, Android (Room, Jetpack)

Tools: GitHub, CI/CD, AWS, MySQL

PROFESSIONAL EXPERIENCE

Full Stack Developer (Contract)

Arkham Enterprises (Apex Solar & Construction) | Remote | 2026

Live Site: arkhamsolar.com

- Built and deployed a multi-page marketing/lead-gen site in React (React Router, Framer Motion) with a Cloudflare Workers backend handling contact and quote-request forms via the Resend API.
- Owned the project end-to-end -- component architecture, theming, SEO (react-helmet-async), spam-protected lead forms, and production deployment.

Full Stack Software Engineer (Contract / Production Delivery)

KIL Construction & Friends of Lake Henry | Remote | 2025

Live Systems: kilcon.work, friendsoflakehenry.com

- Built and deployed full-stack web applications using Astro, TypeScript, Cloudflare Workers, D1/KV/R2, and REST APIs -- serving real clients in production with auth, rate limiting, and CAPTCHA.
- Designed serverless production platforms with signed sessions and secure API architecture; owned end-to-end from schema to deployment, including third-party integrations.
- Managed deployments, production fixes, and client feedback loops independently in a fully remote environment.

Android Engineer -- Best By Manager (Production App)

Google Play: [com.bestbymanager.app](https://play.google.com/store/apps/details?id=com.bestbymanager.app) | 2025

- Shipped kiosk-style Android inventory app to Google Play -- closed beta through v2.0.0 -- with an offline-first Room database, ZXing barcode scanning, and Open Food Facts API integration.
- Architected a three-tier permission model (Owner, Admin, Employee) with PIN-based sessions, bcrypt credential storage, and biometric-gated owner controls.

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering -- Western Governors University, 2025

A.A.S. in IT Software Developer -- Chippewa Valley Technical College, 2024

- AWS Certified Cloud Practitioner (2025)
- CompTIA Project+ (2024)
